

Metropolitan Community College Engineering Technology Center (ETC)

KANSAS CITY, MO

The Engineering Technology Center is a building expansion of the Carter Arts Center on the Penn Valley Campus of the Metropolitan Community College. The building expansion will house the Engineering Technology Department and provide classroom space and outdoor workspace, along with interior renovation of the existing gymnasium and locker rooms.

What We Did

Taliaferro & Browne served as the civil design consultant to Hollis & Miller Architects for the project. T&B provided topographic survey, site design, utility design and landscape architecture services for the project. T&B also prepared a Special Use Plan for the entire Penn Valley Campus, which was reviewed and approved by the Kansas City, Missouri City Plan Commission.
